Nature source

- A "nature source" refers to anything that exists in the environment independently of human creation and that humans can use for their needs, whether it be for sustenance, economic activity, or other purposes.

Agenda

- Portfolio design and layout
- Tools and technologies
- Problem Statement
- Features and functionality
- Projectet Overview
- Results and screenshots
- Conclusion

Problem Statement

- In today's digital era, traditional resumes are insufficient for effectively showcasing skills and projects. Many students and professionals lack a structured online presence to highlight their work. A digital portfolio offers an interactive, accessible platform to present achievements, skills, and experiences comprehensively.

Project overview

- **Header**: A full-screen hero section with a nature-themed background, displaying the user's name and profession.

- • **Navigation**: A sticky navbar for seamless access to About, Skills, Projects, and Contact sections.

- • **About Section**: A brief introduction to the user, highlighting their background and passion.

- • **Skills Section**: A grid-based display of technical skills with hover effects for interactivity.

Who are the end users?

- **Students**: Particularly those in technical or creative fields (e.g., computer science, design, engineering) seeking to showcase academic projects, skills, and achievements to potential employers or academic institutions.

- • **Professionals**: Early-career or experienced individuals, such as web developers, designers, or freelancers, looking to establish a professional online presence to highlight their work and attract job opportunities or clients.

- • **Recruiters/Employers**: Industry professionals who visit the portfolio to evaluate the user's skills, projects, and experience.

Tools and techniques used

- • **html**: Structures the portfolio content with semantic elements (e.g., <header>, <nav>, <section>, <form>) for accessibility and clarity.

- • **CSS**: Styles the portfolio with:

- • **Flexbox and Grid**: For responsive layouts of skills and projects sections.

- • **Media Queries**: To ensure adaptability across devices (desktop, tablet, mobile).

- • **Transitions**: For smooth hover effects and animations.

- • **External Resource**: Unsplash for a nature-themed header background image.

Portfolio design and layout

- **Theme**: Nature-inspired, using a calming color palette of greens (#4caf50, #388e3c, #2e7d32) and earthy tones (#e8f5e9, #f1f8e9) to evoke a sense of growth, sustainability, and harmony.

- • **Aesthetic**: Modern and minimalist, with smooth animations, rounded corners, and subtle shadows for a professional yet approachable look.

- • **Accessibility**: Semantic HTML (e.g., <header>, <section>, <nav>) and proper contrast ratios ensure usability for all users, including those using screen readers or keyboard navigation.

# Features and functionality

- Adapts seamlessly to various screen sizes (desktop, tablet, mobile) using CSS Flexbox, Grid, and media queries.

- • Ensures usability across devices with flexible layouts (e.g., single-column grids on mobile, multi-column on desktop).

- • Uses relative units (%, vw, vh, rem, em) for scalability.

- 2. **Nature-Inspired Aesthetic**:

- • Incorporates a calming color palette (greens: #4caf50, #388e3c, #2e7d32; earthy tones: #e8f5e9, #f1f8e9) to reflect a nature theme.
